

SPMobile

The ServicePoint Mobile option allows technicians in the field to access their service tasks from any web-enabled device. It interfaces directly with a ServicePoint system to provide real-time updating of service activity.

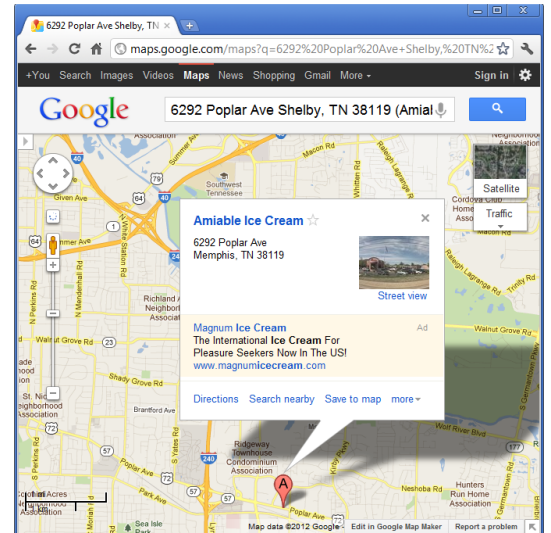

Secure remote login is enabled from any mobile device: tablet, smart phone, Android, iPad, or laptop. Our browser-based architecture runs on virtually any hardware. Technicians can see a listing of their assigned tasks, update their time worked, enter parts used and input notes via touchscreen, keyboard or voice input.

The image shows two browser windows from the ServicePoint Mobile application. The left window displays a 'Work order summary for William' with a table of assigned tasks. The right window shows a 'ServicePoint Work Order 10729 - NOTES' form with a table of notes and a text area for adding new notes.

WO #	Customer	Site Name	Address
10710	1003	Carol Dawn	1438 Corporate La
10714	1001	John Lincoln	1925 Wondernis Dr.
10717	1002	Brian Schmitt	921 Tuckerman Rl
10718	1002	Brian Schmitt	921 Tuckerman Rl
10729	C00127	Amiable Ice Cream	6292 Poplar Ave
10738	1002	Brian Schmitt	921 Tuckerman Rl

Note ID	Description
2012/01/22 18:43:11	Replaced thermostat in freezer
2012/02/23 11:43:23	Added with my phone by talking

Tech Job Listing and Note Entry

Mapping is available, allowing a mobile tech to use GPS navigation on their device to retrieve turn-by-turn directions to the service site.

The image shows a browser window with a signature capture screen. The screen displays the text 'Work Order 12345 - Acme Company' and 'I accept the work as performed:'. Below this is a signature capture area with a blue ink signature 'Sue Smith'. A text input field contains 'Sue Smith' and there are buttons for 'Accept signature', 'Clear', and 'Cancel'.

Touch screen signature capture lets the customer sign for work performed using a finger on a phone or tablet.

ServicePoint SQL Management Software

ServicePoint is the leading service management software product from RTM Computer Solutions. Our software takes full advantage of Microsoft SQL technology to bring you a reliable, robust service management solution that will help productively manage and simplify all facets of your service, support, and repair business.

Since 1987, RTM Computer Solutions has been a leader in providing expertise in automated systems for a wide variety of service businesses around the world. We are dedicated to the development of high quality software products. Periodic updates to our software allow for faster, easier, and more efficient solutions. ServicePoint SQL has been written for use with NCR CounterPoint SQL, Passport Business Solutions, or Great Plains Dynamics.
